

DRAGON SL

HORTICULTURE
LED LIGHT

The **DRAGON SL** is our flagship, high output, small footprint, indoor warehouse or greenhouse solution. With 600 watts of power harnessed by our patented optical system, it projects more light onto and into the plant canopy than LEDs ever have before. The **SL** utilizes active cooling with specialized patent-pending exhaust chambers that help promote transpiration while directing the heat away from your plants. Its waterproof housing allows it to perform year-in and year-out no matter the environment you need it to operate in.

 SCYNCELED

POWER: 600w

INPUT VOLTAGE: 120 - 277V

AMPS: 120v-5 / 240v-2.5 / 277v-2.2

POWER FACTOR / EFFICIENCY: >0.9 / 93%

DIMENSIONS: 48.5" x 7" x 5"

WEIGHT: 31 lbs

WATERPROOF SEALING: IP66 Rating (entire light fixture)

CERTIFICATIONS / TESTING: UL, FCC, RoHS, CSA

UL1598, UL8750, UL8800, CSA C22.2 NO. 250.0-08, CSA C22.2 NO. 250.13

WARRANTY: 5 years

THERMAL MANAGEMENT: Active - IP67 rated fan

SPECTRUM: Full spectrum white (cool & warm) with both deep & far red

SECONDARY OPTICS: patented 120° lenses

DIMMING: full digital control of spectrum, recipes and scheduling

FLUX (PPF): 1,290 $\mu\text{mol/s}$

EFFICACY: 2.15 $\mu\text{mol/j}$

PPFD (suggested use): up to 1,083 $\mu\text{mol/m}^2/\text{s}$ over a 5'x3' canopy

MAX COVERAGE AREA: Flower = up to 5'x4' Veg/Clone = up to 7'x5'

* Detailed PAR maps available at: www.scynceled.com

PAR MAPS:

PPFD ON THE CANOPY

* Coverage area and average PPFD assumes lights are being used in a room with an array/grid of lights or in a tent/room with reflective walls.

5x3 = 1,083 average PPFD @ 15"-18" Height

6x5 = 533 average PPFD @ 30"-36" Height

TUNABLE SPECTRUM

Scynce lights are fully adjustable, putting YOU in control of the spectrum.

SPECTRUM

The DragonSL has 4 channels of LEDs: cool, natural and warm white with a red kicker including both 660nm and 730nm for the Emerson effect.

CONTROL

Dial in the exact recipe of light your plants need with Theia, our mobile app, to gain complete control over the spectrum and scheduling.

OPTICS

Our patented optics allow plants to see equal intensity light from all angles (similar to natural light), resulting in a larger growing surface with more density below the canopy. Optically focused light prevents hot or burned spots & minimizes off grid collateral light loss.

WIRELESS CONTROLS

Connect wirelessly to gain complete control over scheduling and spectrum. Dial in the exact recipe of light your plants need with Theia, our mobile app.

THEIA (thee-uhh)

- Android & iOS based app
- Group control lights via our wireless mesh network.
- Intensity / Dim to Zero
- Ramp on Time (sunset/sunrise)
- Time on and off / Scheduling
- Custom Spectrum & Recipes

PATENTED LIGHT DELIVERY

Our patented optics allow plants to see equal intensity light from all angles (similar to natural light), resulting in a larger growing surface with more density below the canopy while preventing hot spots, bleaching or burned leaves.

LIGHT DISTRIBUTION CURVE

NO OPTICS
CONIC 120°

The Conic 120 degree optic is the ideal choice for vertical and indoor applications where the lights need to be mounted at a height between 6" and 36", providing an equal distribution of light over the canopy.
